OASIS

Increase the Number of First and Second Year Students Served in OASIS

Providing Department:

OASIS

Responsible Roles:

Agustin Orozco (SD0000056994@ucsd.edu)

Unit Goal Description:

Increase the number of students served in OASIS transition programs for first and second year students.

Metric 1:

Increase the number of students participating in the OASIS/SRS Learning Communities from 280 in 2016-2017 to 360 in 2017-2018

Result 1:

We exceeded the goal of increasing students participating in OASIS/SRS Learning Communities every quarter. Altogether we had 457 unique students participate in OASIS/SRS Learning Communities, which included students from Summer Bridge, TRIO SSSP, and CASP.

Metric 2:

Increase the number of students participating in the OASIS/SRS 2nd Year Programs from 100 in 2016-2017 to 140 in 2017-2018

Result 2:

For the 2017-2018 academic year, 325 students participated in OASIS/SRS 2nd Year Programs. 121 students were part of the 2Excel program, which offers high-touch services. 204 students participated in 2Connect, which is a lower-touch service that connects students to various resources across campus.
Summer Bridge 2017 students will outperform their comparative peers in their academic outcomes.

Providing Department:

OASIS

Responsible Roles:

Unit Goal Description:

Metric 1:

Summer Bridge 2017 students will have higher GPA distributions that exceed their peers with similar incoming academic profiles.

Result 1:

Summer Bridge 2017 students had a higher average GPA distribution compared to their peers with similar incoming academic profiles. This assessment controlled for high school GPA, SAT equivalency, and predicted first quarter GPA of incoming students to ensure that we were
making an apples-to-apples comparison based on academic preparation. For all three quarters, Summer Bridge students outperformed their comparative peers. The average GPA for the Fall quarter was 2.84 (compared to their peers of 2.66), Winter was 2.73 (compared to their peers of 2.66), and Spring was 2.84 (compared to 2.68). (complete goal description above - the way it reads suggests SB AND OLC participation will be looked at in terms of academic outcomes)
