Associated Students

Match the demographics of Triton Food Pantry Users to those who indicated they sometimes to often ran out of food before they could buy more.

Providing Department:
Associated Students

Responsible Roles:

Unit Goal Description:
The Triton Food Pantry currently serves 12.5% of the campus. In the most recent University of California Undergraduate Student Experience Survey UC San Diego students reported the following: 28.3% of UC San Diego Undergraduate Students reported that they sometimes to often ran out of food before they could afford to buy more. (UCUES, 2016). As pantry utilization continues to increase, we hope that the pantry's user demographics will meet demographics of those who indicated they sometimes to often ran out of food before they could buy more.

Metric 1:
The Pell-recipients of the pantry users will match or exceed the percent of Pell-recipients who indicated they sometimes to often ran out of food before they could buy more

Result 1:

Metric 2:
The commuter student distribution of pantry users will match or exceed the commuter student distribution of those who indicated they sometimes to often ran out of food before they could buy more

Result 2:

Metric 3:
At least 50% of those who indicated that they experience some sort of food insecurity, as least stipulated by the UCUES, are accessing the pantry.

Result 3:

Metric 4:
