Associated Students

Increase the number of Triton Food Pantry users, in an effort to aid in reducing the number of students who report experiencing food insecurity.

Providing Department:
Associated Students

Responsible Roles:
John Weng (SD0000022575@ucsd.edu)

Unit Goal Description:
Increase the number of Triton Food Pantry users, in an effort to aid in reducing the number of students who report experiencing food insecurity.

Metric 1:
In the most recent University of California Undergraduate Student Experience Survey UC San Diego students reported the following: 28.3% of UC San Diego Undergraduate Students reported that they sometimes to often ran out of food before they could afford to buy more. (UCUES, 2016) In 2016-2017, 7.4% of the student body (graduates and undergraduates) visited the Triton Food Pantry at least once. In 2017-2018, the Triton Food Pantry will increase the number of student visits to 10% of the student body, in an effort to bridge the gap between students who report food insecurity and students who are using the Triton Food Pantry.

Result 1:
In 2017-2018 the Triton Food Pantry received 4595 unique visits, which is 12.5% of the student body. This exceeds the original goal of 10%.

Metric 2:

Result 2:

Metric 3:

Result 3:

Metric 4:
Result 4:

Data Collection/Retrieval:

The data was collected through the Student Life Scanner system. Students scan in at each distribution. Duplicate PIDs are removed to provide a unique PID count.

Using Results:

Our goal of reaching 10% was met. For the future, we are interested in better understanding the demographic breakdown of the pantry to ensure that groups that may demonstrate higher levels of food insecurity are being served to match corresponding campus demographics.
